

THE OMA-ENDORSED INDUSTRY SECTOR PARTNERSHIP NETWORK MAP AND DIRECTORY

2026-2028 Endorsement Cycle

Industry Sector Partnership (ISP) approach is a proven workforce development strategy that puts employers in the driver's seat and has demonstrated effectiveness across the country. Manufacturers within a regional labor market work together to align around common solutions with education and training providers, economic and workforce development establishments, and community organizations.

The Ohio Manufacturers' Association (OMA) endorses Ohio manufacturing ISPs that implement the following governance best practices:

1. Implement a leadership structure driven by manufacturing employers,
2. Focus on the manufacturing sector as a whole,
3. Focus on a region in Ohio,
4. Focus on workforce development issues,
5. Convene through a neutral intermediary,
6. Appoint an eligible manufacturer representative to the OMA Workforce Leadership Committee, and
7. Align with the Strategic Workforce Pillars described in [Ohio's Manufacturing Workforce Blueprint](#).

The OMA sorts endorsed ISPs into primary regions based on county coverage. Regional groupings are shown below. Many ISPs span multiple regions, and these additional regions are noted in their individual profiles in the following pages. The OMA's regions align to the [JobsOhio Economic Development Regions](#).
